Temple Normanton Junior Academy i-vengers Online Safety Survey Feedback April 2023

63 pupils and 56 parents have completed the survey with participants from all year groups. The results at Temple Normanton Junior Academy are in line with other results from the survey which encompasses Derby City and Derbyshire Primary Schools.

In light of the findings the school should concentrate efforts on reaching out to parents and carers and educating them on some of the risks that their children may be facing and what they can do at home to keep their children safer.

Whilst all of these potential risks can be managed with a good education programme, parents may not be aware of the issues happening at home. The concern is that parents think they are keeping their children safe and take their eye off the ball, when the reality is that children are able to bypass the parental controls that are in place. It may help to remind parents to revisit the parental controls they have set and remind their children of the family rules that have been agreed.

May I recommend that you look at Project Evolve, which is a free suite of resources that will help you with some of the issues identified in the survey. <https://projectevolve.co.uk>

I have attached the raw data that I currently hold and have translated some of the findings into the attached document.
