Love Reading

Pupils are provided with many opportunities for reading across the maths curriculum, whether that is through problem-solving using problems in different contexts or learning about famous mathematicians that have changed history.

World Citizens

Maths is an essential skill that enables us to live an independent life. It teaches us how to make sense of the world around us, whether it be: calculating the total amount of money we need to purchase items, knowing what time to meet a connecting train or weighing precise amounts of ingredients when following a recipe. Maths helps us to develop problem-solving and reasoning skills that allow us to solve a variety of problems.

Be Aspirational

Our Maths curriculum allows children to be stretched and challenged through reasoning and problem-solving that is included in every lesson and across all areas. At Temple Normanton Junior Academy, we have high expectations of all pupils and work hard to ensure all pupils are able to achieve their full potential. Children are challenged to rapidly recall and apply knowledge accurately, becoming fluent in mathematics through varied and frequent practice with increasingly complex problems.
