

Computing

Impact Statement

Engagement and Enjoyment

Pupils are actively engaged in their computing lessons, demonstrating enthusiasm for learning and a positive attitude towards technology. They are keen to explore new ideas, take risks, and persevere when faced with challenges. Pupils will make good progress from their starting points and will leave Temple Normanton Junior Academy ready for the next stage of their education and able to navigate a world in which technology is everywhere.

Digital Literacy and Online Safety

Our pupils are digitally literate and possess a strong understanding of how to use technology safely, responsibly, and ethically. They have a critical awareness of the potential risks associated with the digital world and know how to protect themselves and others online. Pupils confidently navigate digital environments and demonstrate responsible online behaviour.

Aspirations and Future Opportunities

Our computing provision nurtures pupils' aspirations and equips them with the necessary skills and knowledge to pursue further education and careers in the digital sector.
